User Persona 1: The Curious Student

Emma, 16

High school student

Emma enjoys learning about science, psychology, and space, but she wants to explore topics beyond what she learns in school.

- Age: 16
- Occupation or student status: High school student
- Goals:
    - Discover new subjects that interest her.
    - Learn fun facts and understand how the world works.
    - Explore topics outside her school curriculum.
- Challenges:
    - Doesn't always know where to start when learning something new.
    - Finds some online information confusing.
    - Gets bored with long explanations.
- How CurioBot would help her: CurioBot would recommend interesting topics, provide short interactive lessons, and suggest new subjects based on her interests.
- Quote: "I love learning new things, but sometimes I don't know where to start."

User Persona 2: The Struggling Learner

Jayden, 15

High school student

Jayden wants to understand what he learns in class, but he sometimes struggles with difficult concepts and needs extra help.

- Age: 15
- Occupation or student status: High school student
- Goals:
    - Understand difficult subjects more easily.
    - Improve his knowledge and confidence.
    - Check what he has learned.
- Challenges:

    - Finds complicated explanations hard to follow.
    - Sometimes feels uncomfortable asking questions in class.
    - Has trouble knowing which topics he needs to review.
- How CurioBot would help him: The AI learning assistant would explain ideas step by step, provide simple examples, and use quizzes and progress tracking to help him review challenging topics.
- Quote: "I understand things better when someone explains them in a simple way."

User Persona 3: The Independent Explorer

Sophia, 18

First-year college student

Sophia enjoys discovering new ideas and learning about subjects outside her main studies. She wants to learn at her own pace.

- Age: 18
- Occupation or student status: First-year college student
- Goals:
    - Explore new interests, such as art, technology, and history.
    - Learn useful things in her free time.
    - Build knowledge independently.
- Challenges:
    - Has a busy schedule and limited free time.
    - Finds it difficult to choose reliable, useful learning resources.
    - Often jumps between topics without a clear learning path.
- How CurioBot would help her: CurioBot would organize lessons into personalized learning paths, provide bite-sized videos and articles, and track her progress so she can keep learning at her own pace.
- Quote: "I want to keep learning outside of school, but I need something flexible and easy to use."
